LEISURE

From professionals to professionals. Tactical Textiles.

DEAR READER,

Galvi-Linda Ltd is a large-scale manufacturer of goods made from leather, textile and synthetic materials. Our aim is to offer products that are of high quality, functional and comfortable, and at the same time look good. Our product line includes items like military rucksacks, bags, vests and harnesses, professional special-purpose life jackets that are, for example, also used by NATO, covers for splinter-proof vests for the United Nations Peacekeeping Missions, gun bags and tents, rucksacks for mountaineers, different kinds of upholsteries for seats and wheelchairs. We also produce a wide range of haberdashery and leather goods.

Galvi-Linda is interested in finding new contacts and clients. We are ready to work with your company to satisfy your needs and to produce goods for either military or civil purposes. Your wish is our command.

ABOUT GALVI-LINDA

Historically, our company dates back to 1939 when it was established by seven entrepreneurial artisans. Modern-day Galvi Linda limited company was born in 1991 and has been operating for **more than 15 years gathering experience and knowledge** that are put to use on a day to day basis. Our loyal customers value the fact that our products represent the best quality and that the company itself is reliable and constantly developing. Today we employ over 200 highly qualified workers and a talented and professional product design and development team. That is why the quality level and design of our products are among the best in the region.

We thank you for taking interest in our company. We welcome your inquiries and believe that your cooperation with Galvi-Linda Ltd will be profitable for all parties concerned.

Our contact information:

AS Galvi-Linda, Tallinna 44, Viljandi 71008, ESTONIA

PRODUCTION CAPACITY

Our facilities provide Galvi-Linda Ltd with the flexibility to manufacture and deliver within the deadline a large assortment of products in quantities demanded by our customers. Our turnover is approximately 4 million Euros per year and it has been increasing from year to year. Currently, about **70 % of our products are exported. The main export destinations are Scandinavia and Germany.** Over the past eight years, we have also been offering sub-contracting work, namely sewing, for our valued customers in **Norway, Sweden, Germany and Finland. We are open to all forms of cooperation with export markets.**

MILITARY GOODS

Our company produces a large variety of work clothes, military vests, rucksacks, bags and harnesses, professional special-purpose life jackets, which **are also used by NATO, covers for splinter-proof vests for the United Nations Peacekeeping Missions, gun bags, ammunition pouches, tents, rucksacks for mountaineers, various upholsteries for seats and wheelchairs.**

We supply the Estonian Defence Forces with rucksacks and harnesses. Our models have been tested by the Estonian army in all kinds of military and combat situations and have been approved in terms of resistance, quality and functionality.

In the past years our products have been tested and used successfully in Iraq and Afghanistan missions.

Andres Rebane
CEO

QUALITY

Galvi-Linda is a result-oriented company. Despite of many changes made over the past, our aim has remained the same – to deliver high quality goods. With products like ours, quality is paramount. That is why we have put in place a quality assurance system based on ISO 9001:2000 quality assurance standard. In 2002, Galvi-Linda's quality assurance system has been approved by Lloyd's Register Quality Assurance Ltd. As quality assurance requirements develop, we feel that in order to be competitive we need to keep up with the latest developments also in this field. We are proud to say that work is ongoing to obtain the NATO quality assurance certificate AQAP 2110.

Export Markets of Galvi-Linda

A chain is only as strong as its weakest link.

How Do We Do This?

We offer unique solutions from a professional producer to a professional user.

Galvi-Linda is ready to satisfy the needs of even the most demanding customer. All clients are unique and their wish is our command. In the end it all comes down to the smallest detail. We owe our success to our clients and our long term cooperation with them. Discover our work ethic and core values – do not hesitate to contact us!

Our development team maps the exact needs of the client and selects the best materials and technology required for production. We constantly work on our existing solutions and develop new and improved ones for every customer according to their specific needs. We have made it our habit to push the limit by offering our clients the solutions that surpass their every expectation. By doing so, we guarantee the highest level of customer satisfaction.

All of our solutions have been developed keeping in mind the needs of the actual end user. High quality of our products and customer satisfaction are achieved by an ongoing product development and improvement process. We produce samples that have been developed in cooperation with the client and agreed on over every little detail.

We work with commitment trying to exceed all your expectations.

Approval and Order

Production and Quality Assurance

Evaluation and Continuous Development / Feedback

Before a product is sent to production, it has to be approved by the client.

We keep meticulously to deadlines. All products will be ready in due time. The production capacity of our factory allows us to cope even with the shortest of deadlines. In addition, we are able to deliver the goods exactly to where they are needed. Since 2002 we apply the quality assurance standard ISO 9001:2008 and high quality is also assured by our competent and experienced staff. We have all the equipment and machinery necessary for the production of products and for offering solutions that are up-to-date and require the latest technology.

We attach great importance to feedback given by the client after every order or lot. The information received from the end user is of special value to us. In case of a longer term relationship, it helps us develop further the products already in use. We are in constant search of perfection. Even the smallest detail counts. A chain is only as strong as its weakest link. We are proud to say that our products are closer to perfection than any other analogous product. It has been possible only thanks to our cooperation with our clients. Please contact us for any references. Become a customer!

Galvi Linda's product range includes various load bearing equipment items the aim of which is to improve the users' load handling needs at the same time ensuring their maximum protection.

Galvi Linda's load bearing equipment products are MOLLE-compatible and can easily be integrated or upgraded with other similar equipment. This makes our products versatile, easy to use and cost-efficient. Special attention is paid to the flexibility, functionality, durability, comfort and quality of such equipment. Our products have been tested in real life situations and missions. We understand that no shortcuts can be made when there may be lives at stake.

Every mission is different and raises various capability and needs related concerns. We in Galvi Linda are prepared to respond to those needs whenever they concern load bearing equipment. For us no detail is too small. We take pride in the fact that in cooperation with our clients we are able to offer solutions for load bearing equipment that take into account the end-user requirements as much as possible without compromising the protection qualities of the final product.

This is a pouch to hold a gas mask. Its front wall is reinforced with plastic. In addition to MOLLE-compatible attachment point on the back of the pouch it also features belt straps.

Galvi Linda has versatile experience and know-how in the production of special clothing for the police and SWAT teams. Our long-term development work and knowledge ensure a high level of customer and end user satisfaction. It is important to us that the special purpose clothing designed for the law enforcement officers is comfortable, extremely durable and of high quality. Functionality receives equal attention.

In the end it all comes down to the smallest detail. There are no weak links in our chain of production thanks to our advanced development process. The selection you can find in this catalogue represents only a fraction of our product range. As already mentioned before, we are able to develop solutions tailored to every client's needs and demands. Therefore, the catalogue you are holding could be said to be an introduction to our products. I would simply have been impossible to include every last one of our products on these pages.

Tactical Vest for Police

Fold-out and velcro-closed medical pouch intended for K-9 operators. Plastic and mesh net pockets and elastic loops inside for securing instruments. Belt attachment points and a wrist strap on the back panel.

Backbags ■ Gunbags and Hunting Gunbags ■ Clothing

Rucksack

Rucksack 108-4
NSN code: 8465-38-000-9536
Material: cordura
Color: Military green

Short Description: The rucksack has two removable side pockets, which can be zipped together and used as a separate rucksack. Either or both of them can also be attached to the back of the vest of infantry accoutrements. The size of the rucksack can be reduced by removing the side pockets and closing the zippers on the sides. At the bottom part of the rucksack there is a separate compartment for footwear. Under the rucksack the rolled sleep mat can be attached. The product is sewn with strong impregnated thread. The critical points in the seams have been reinforced with short stitches (reeled). The polypropylene strap seams are finished with transverse stitch, to make it the fasten-

ing stronger. The fastening and connecting straps are made of woven polypropylene fibre material with a minimum tensile strength of 700 kg. The carrying capacity of plastic quick release buckles of 25 mm width is 85 kg and of 50 mm width - 140 kg. The minimum carrying capacity of the D-ring is 60 kg.

The minimum carrying capacity of the round buckle is 85 kg. Favolon of different thickness has been used for padding the hip support, back and shoulder straps. Two metal rods inside reinforce the back.

The rucksack uses snap fasteners consisting of the head and the foot, which in its turn consist of an upper and a lower part, to avoid spontaneous opening. The bracket in the lower part of the snap fastener head closes and opens in one direction only. To close the snap, the edge towards the bracket has to be placed in the round hollow of the snap foot and, keeping the bracket in the round hollow, push the snap head and foot together. To open the snap, the bracket must be pulled from the opposite edge - to separate the snap head and foot.

The rucksack has two removable side pockets, which can be zipped together and used as a separate rucksack. Either or both of them can also be attached to the back of the vest of infantry accoutrements. On the side pockets there are loops and fastening straps for attaching different items.

The size of the rucksack can be reduced by removing the side pockets and closing the zippers on the sides. At the bottom part of the rucksack there is a separate compartment for footwear. A zip-closed pocket covers the inside of the back. Zip-closed pockets are on the flap and the front side of the rucksack. On the flap pocket there are loops and straps to attach different items. On the front side are loops to attach different items. The map case can be attached to the flap fasteners on the front side of the rucksack.

Patrol pack

Patrol pack 108-18
30 litre
NSN code: 8465-38-000-9537
Material: Cordura
Colour: Military green

Short description: A bag with drawstring and flap closure and two side pockets. Its front panel has strings for attaching MOLLE gear. The bag has padded shoulder straps with strings and D-rings for attaching the gear. It also has a sizeable inside compartment for documents and for drinking water pouch. Under the bag there is a separate compartment for rain and dust cover.

Duffel bag 104-87
NSN code: 8465-38-000-9402
Material: Polyester
Colour: Military green

Short description: The equipment bag has shoulder straps and a carrying handle. The bag is closed with carbine.

Bags

Patrol pack 111-58

30 litre

Material: Cordura

Colour: Military green

Short description: This heavy duty patrol bag features 1 large compartment (with 2 various zip and mesh inner pockets) and 2 small front compartments. Pocket for a hydro pack. All compartments are closed with 2-way zippers. Ergonomically designed shoulder straps are padded, about 5cm wide and adjustable in length. The pack has a padded back and an adjustable waist strap opened with a clip. Compression straps, possibility to attached additional equipment through a number of nylon MOLLE straps all-round, and loops and D-rings on shoulder straps.

Bag for hand luggage 109-53

NSN code: 8465-38-000-0619

Material: Cordura

Colour: Military green

Short description: The bag is complete with carrying handles and is suitable for carrying documents. It is zip-closed and has zipped pockets in front and inside.

Clothing

Combat clothing.

This includes all kinds of weather-resistant, durable and functional clothing for combat, military, law enforcement and other similar extreme situations.

Hunting gun bag, 103-58

This is a padded bag to protect the gun and its optics. The bag is complete with a hanging hook, carrying handle and shoulder strap.

Automatic weapon bag, 105-307

This is a padded bag to protect the weapon and its optics. The bag is complete with a hanging hook, carrying handle and shoulder strap. It has a pocket on the outside for magazines and a pocket inside for cleaning supplies.

Gun Sling

Sling, 106-67

This is a three-point sling designed for automatic weapons. It can be complemented with paddings and different attachments, e.g. carbines and breech attachments.

SUBCONTRACTING WORK

Besides our own production Galvi Linda provides subcontracting services to several well-known and successful companies and trademarks all over the world. Due to competition rules we are, however, unable to name them in this catalogue, but do not hesitate to contact us in case you have any questions. Our customers and partners rely on our high level of professionalism and the quality of the product. We provide subcontracting services in all our product categories, although most often our clients turn to us with relation to leisure and hunting goods.

It is safe to say that we are a trustworthy, loyal and quality-orientated partner. We believe that you find cooperating with us useful and profitable.

If you are interested in our subcontracting services, please send us an e-mail at
tanel@galvilinda.ee
